PROFESSIONAL PROFILE

Information Systems student at UFRPE specializing in cloud architecture, Artificial Intelligence modeling, and Cybersecurity (Red Team). Strong problem-solving skills with a focus on applying software engineering, security, and AI to build and defend scalable, intelligent systems. Eager to apply hands-on experience in Python, Machine Learning, and Large Language Models to drive impactful, production-ready AI solutions.

EDUCATION

Universidade Federal Rural de Pernambuco (UFRPE)

Bachelor of Information Systems (BSI) - 3rd Period | Sep 2025 – Jul 2029 (Expected)

EXPERIENCE

Flyrank

Machine Learning Intern

- Studied and applied machine learning tools, including extensive data manipulation using Python libraries.
- Utilized platforms such as Hugging Face to access and manipulate open-source models for developing AI-driven solutions.
- Worked directly with and integrated advanced Large Language Model APIs, including Gemini, ChatGPT, and Claude.

TECHNICAL SKILLS

- Languages & Web:** Python (Advanced), Ruby on Rails, SQL (PostgreSQL), React.js, JSON.
- AI & Cloud:** Neural Networks (Perceptrons, ADALINE, MLPs, LSTMs, Diffusion Models), Microsoft Azure (Machine Learning, Computer Vision, NLP, GenAI, Azure AI Foundry), OpenAI Whisper.
- Cybersecurity & OS:** Information Security, Network Security, Risk Management, Offensive Security (Red Team). Daily Linux user (Mint and Kali) for development and automation.
- Software Engineering:** Logic Programming, Algorithms & Data Structures, Full Stack Development, Containerization (Docker).
- Tools, Design & Languages:** Git, VirtualBox, Flask, Figma, Canva. English C1 Advanced (Proficient in reading technical documentation and global collaboration).

NOTABLE PROJECTS

Buffet Brain AI Autonomous Investment Profiling Platform

Developed an intelligent financial platform for autonomous investor profiling and investment guidance. Engineered a three-tier architecture comprising a psychological engine (using an LSTM neural network to analyze 10 years of financial history for true risk tolerance), a quantitative engine for real-time B3 market data scraping via Yahoo Finance, and a generative AI engine for personalized investment rationales. Currently functioning as a responsive Single Page Application (SPA) with automated fallback mechanisms, with plans to scale into a fully comprehensive platform.

FlyFood Logistics & Route Optimization

Developed collaborative academic software focused on drone delivery solutions. Implemented brute-force algorithms and Manhattan distance calculations for efficient routing and logistics optimization.

Jarvis Virtual AI Assistant

Created an AI assistant developed in Python, operating within a containerized Docker environment. The project includes virtual display manipulation on Linux to automate tasks smoothly.

AI Audio Transcription Automation

Developed a batch script executed in a Linux environment for the automated capture and transcription of system audio and media, utilizing OpenAI's advanced Whisper speech recognition model.

CERTIFICATIONS & ACHIEVEMENTS

- Claude Code 101, Claude 101, AI Fluency for Students, AI Fluency: Framework & Foundations, AI Fluency: AI Capabilities & Limitations - Anthropic
- Microsoft Certified: Azure AI Fundamentals (AI-900) - Microsoft (Apr 2026)
- ISC2 Candidate - ISC2 (Apr 2026)
- Full Stack Developer Professional Qualification - Senac Pernambuco (Oct 2025)
- Ideathon Winner - Maratona de Ideias - Congresso Sesc
- Certificate of Participation: Hackathon'Play BBTS - BB Tecnologia e Serviços (Oct 2025)
- Logic Programming Course (60h) - Senac Pernambuco (Apr 2025)
